

New Spider Design PRX Rider Trowel from MULTIQUIP

Clean burning Gasoline/LPG Ford Power Products 3.7 liter V6 engine

- **New spider design** produces ultimate floor flatness
- **Liquid-cooled, multi-phase drive motors** deliver maximum torque at break-away RPM
- **Proportional hydraulic steering control** transitions directional movement smoothly
- **All-new frame design** features walk-around deck
- **Digital display** provides information at a glance
- **Active Speed Control** enables operator to precisely set rotor speeds
- **Reverse drive rotation** allows the operator to initiate direction change by the touch of a button. Reverse rotation redirects material movement in the desired direction while still traveling forward. Unit must be at rest prior to direction change.
- **Rotor Jog** facilitates lifting; enables operator to jog the rotors, preventing surface marring while standing in front of the machine.

Model	Path Width in.(mm)	Legs per Rotor	Rotor RPM	Steering Type	Engine	HP (kW)	Engine Cooling	Fuel Type	Fuel Capacity	Weight lb. (kg)
PRX	146 (3708)	8	100	Proportional Hydraulic	Ford Power Products	107 (79)	Liquid	Gasoline	35 gal.	3,500 (1587)
						118 (88)		LPG	33.5 lb.
