

Re-Cap™ Concrete Resurfacer (No. 1131-47) is a special blend of portland cement, sand, polymer modifiers and other additives. Designed to provide a shrinkage compensated repair material for making thin repairs to sound concrete in need of surface renewal. Can be squeegee, trowel or brush applied.

4x greater bond strength, superior workability and longer working time than other resurfacing products.

Designed to repair and renew old, spalled concrete with a permanent wear resistant surface that can withstand foot, vehicle and other heavy traffic, the new QUIKRETE® Re-Cap Concrete Resurfacer has a bond to concrete that is four times stronger than the concrete itself. That means, a concrete substrate will fracture or crack before its bond with QUIKRETE® Re-Cap Concrete Resurfacer.

QUIKRETE® Re-Cap Concrete Resurfacer has superior working time and flow characteristics than other resurfacers on the market. As a result, it's easier and faster to transform a deteriorated concrete surface into a durable, long-lasting sidewalk, driveway or patio.

In addition to establishing a new standard for resurfacing concrete, QUIKRETE Re-Cap is packaged in an exclusive Weather Barrier Bag™ that will protect it from inclement weather and other harmful elements for up to eight months.

Available in:
40 lb. bags – 64 per pallet

Use For:

- Sidewalks
- Pool Decks
- Concrete Floors
- Driveways
- Patios
- Parking Decks
- Floors
- Curbs
